B & PW Club Plans District Meeting

The Elba Business and Professional Women held their regular monthly meeting at Paul's Cafe Monday, this week.

The meeting was called to order by Miss Gladys Clark, president. The members were urged to make plans to attend the District meeting to be held in Andalusia September 10. After the reading of minutes by Acting Secretary June Ray Jones, and the Treasurer's report by Miss Frances Conner, the meeting was turned over to Mrs. Mary Carney, Program Chairman. Mrs. Carney introduced Miss Donna Pittman, Miss Pollyann Clark, and Miss Tula Davis, all representatives from Coffee County to Girls State last June. They gave an interesting day-by-day account of events during their week at Girls State. After the meeting adjourned, the girls explained an exhibit of souvenirs they had on display.

Members present included Mrs. Mary Carney, Mrs. Myri Carpenter, Miss Gladys Clark, Miss Frances Conner, Mrs. Zelma Devane, Mrs. Sara Englen, Miss June Ray Jones, Miss Eleanor Lee, Mrs. Myrtle Sellers, Mrs. Annie L. Vaughn, Mrs. Betty Cox, and Mrs. Colley Pittman, visitor.

Shiloh Revival

Rev John Sanders, regular pastor at Shiloh Baptist church will deliver the sermons at the revival to open Sunday, August 20, and continue one week. The Rev. Mr. Moses, of Albany, Ga., was originally scheduled to fill the pulpit but will be unable to fill the engagement.

Cotton Pickin' In Coffee in Process

The first bale of cotton has been ginned in Elba and it netted its owner a dollar a pound.

Lemon Rogers, Negro tenant farmer, of Route 4, Elba, in the Damascus community, brought the first load of cotton this year to Morrow Gin Thursday, last week. It weighed 348 pounds. With a premium of \$50.00 paid from the Chamber of Commerce treasury, and the remainder made up by interested persons, he was paid \$348.00.

Montgomery - Crop production outlook for 1961 was most favorable on August 1, according to the Alabama Crop and Livestock Reporting Service. Very good corn and peanut crops are indicated. Cotton is somewhat disappointing due to late planting and adverse growing conditions early in the season. This crop, however, showed much improvement during the second half of July, particularly in North Alabama. Small grain crops were harvested earlier with good yields realized. Late planted crops such as soybeans and sorghums are making good growth. Harvest of a large peach crop is well advanced and a near record-large crop of peaches is indicated.

A few dry spots were developing over the State in late July and early August. Timely showers have replenished moisture supplies in most areas and growing conditions are currently favorable.

Corn Production of corn for grain is forecast at 45,200,000 bushels. This is above last month's forecast of 44,000,000 bushels. Acreage for harvest is well below last year due to participation in the Feed Grain Program, but the prospective yield of 32.0 bushels per acre is a record high. Showers since August 1 were timely.

Cotton August 1 conditions point to a cotton crop of 640,000 bales of 500 pounds gross weight each. This is well below the 750,000 bales produced last year despite a 5 percent increase in acreage. Indicated yield per acre at 341 pounds since 1954. In all parts of the State, and especially northern counties during the remainder of the season.

Peanuts The first forecast of peanut production for 1961 is placed at 210,100,000 pounds. This compares favorably with last year's crop and is 5 percent above the 10-year average production. Acreage for picking and threshing is estimated at 191,000 acres, the same as last year. Yield per acre at 1,100 pounds is only slightly below last year's record yield of 1,185 pounds. Favorable moisture thus far in August increases prospects for a good peanut crop.

Soybeans Production of soybeans is expected to show a further increase in 1961. A crop of 3,648,000 bushels is indicated by August 1 reports from growers. This compares with 3,192,000 bushels produced last year. Expansion of acreage accounts for the increase with yield forecast at 24.0 bushels per acre, the same as in 1960.

Sorghum Sorghum grain production is forecast at 425,000 bushels, compared with 480,000 bushels the previous year. Power acres for harvest account for the decrease.

Hay Hay production at 565,000 tons is indicated at about the same level as last year. Better yields offset most of the reduction in acreage for harvest. Showery weather has prevented timely cutting. As rains subsided in late July and August, farmers saved good supplies of hay.

Peanuts A near record crop of 35 million pounds of peanuts is forecast for Alabama. This is about double last year's crop and compares with the 1950-59 average production of 18,380,000 pounds. A good set was reported on most orchards and ample moisture has favored development.

Milk and Eggs Milk production during July totaled an estimated 96 million pounds, up a million pounds from the revised level for the previous month and 3 million pounds above production in July 1960. Egg production in July at 113 million eggs produced in July, last year. The 6,399,000 layers on farms during July were up 5 percent from a year ago. Rate of lay at 17.21 eggs per layer was 2 percent higher.

Warr Emphasizes Eyes For Safety Dr. E. M. Warr, optometrist, told the Elba Rotary Club last week that one of the greatest needs for highway safety is regular eye examinations of each driver.

Alabama and other states require more personnel than their highway safety departments can afford, but he continued, the fact is that a driver may have perfectly good eyes when he takes his first examination but continue to have his driver's license renewed though going blind.

There is no state law to require periodic examinations of the eyesight of school bus drivers, although Denary School boards require it, he said.

4 Elbians Seek Degrees At Auburn

Eugene C. Griffin, Doyle M. Carpenter, Nellie M. H. English and Harvey J. Locklar, all candidates for degrees of Master of Education.

Ira R. Allen Is Named To Group To Pass On FHA Loans

Ira R. Allen, Coffee county farmer, has been named to the Farmers Home Administration area committee, according to James S. Pridden, the agency's county supervisor in Enterprise. The appointment is for three years which began July 1st.

The purpose of the area committee is to review applications for FHA loans. Composed of three members, the committee is set up on a rotation basis with one new member each year. Mr. Allen succeeds Roy L. Ellis, Route 1, Enterprise, who has served on the committee the past three years. Other committee members are Paul L. Woodall, R-1, Midland City, and Eugene Parris, R-3, Elba.

Mr. Allen owns several hundred acres of farm land in the Goodman community of Coffee county which he has operated for the past 20 years. He is a row crop farmer, growing cotton, peanuts, and corn. In addition to crop production, Mr. Allen carries a herd of beef cows, and sells approximately 200 head of hogs each year. He has ample improved pasture to carry all his livestock. His family includes his wife, two married daughters, and one daughter at home attending high school.

The Farmers Home Administration extends credit accompanied by technical assistance to 170 families in Coffee and Dale counties. Many have made use of these loans to strengthen and improve their farming operations. Many have bought new homes, enlarged their farms, improved their pasture, replaced inefficient equipment, and bought livestock to improve their quality.

The Farmers Home Administration office is located at 116 Easy Avenue in Enterprise.

Nevin Stresses Education Lack

E. C. Nevin, principal of Kinston High School, reported to the Elba Rotary Club Monday, this week, a statement made to him by an economist at Columbia University.

"Before the Civil War, Alabama was one of the five richest states in the union. It is now one of the poorest. With Alabama's natural resources, the state can again be one of the eight richest by the year 2000 if you will do something about your educational system. Alabama has one-tenth of all natural resources of the entire nation."

Prof. Nevin continued that Alabama is next to the bottom in education, and has one of the poorest school attendance records of any state in the nation. "In Kinston, we have children living almost in the shadow of the school building who do not go to school. We have school attendance laws, but they are not enforced in this county or elsewhere in Alabama."

"The Master Teacher of all time was a man named Jesus. He had a class of 12. There are some classes in Alabama with 50 students."

"Education, like everything else, has a price tag on it. Teachers in Alabama have only to step across the line into Florida and add \$600 a year to their income."

"One of Alabama's greatest friends is more trade schools. Public trains are indications for each citizen. In America we train two technicians for each engineer."

Horse Race

There will be a horse race sponsored by the Elba Jaycees Sunday at 3:30 p.m. at the race track behind the Elba Stockyard.

TIME FOR THE WIND - UP

(An Editorial)

Now is the time for all interested in the progress of Elba to join the Chamber of Commerce.

The Chamber of Commerce belongs to no one individual or group of individuals. It is, or should be, the central clearing house for efforts to promote Elba.

A membership drive was launched at the July meeting and active members divided into teams with team-captains to canvass Elba. Reports at the August meeting Tuesday, this week, were discouraging for those interested in the Chamber of Commerce and the progress of Elba.

Membership the past year was 69. Reports at the meeting Tuesday, this week at Elba Grill, showed little more than half this number have signed anew.

Plans were laid for the final canvass during the next week with the drive to be brought definitely to a close at a meeting of team captains at Paul's Cafe Tuesday, noon, next week.

Any non-member who wishes to enroll, and who has not been contacted, is requested to send his membership direct to Duke Tatum, Jr.

Albert Boutwell Likes The Clipper

Like a visit to Elba is the way Lieut.-Gov. Albert Boutwell describes the receipt of his copy of The Elba Clipper in a letter to this newspaper accompanied by a check for four dollars for his subscription renewal.

His letter follows in full:

The Editor,
The Elba Clipper,
Elba, Alabama
Dear Sir,

I have just finished reading my latest copy of the Elba Clipper. The pleasure of finding familiar names and activities is a little like making another visit to the Elba community, a thing which I would like to do more often if the demands of my office and a necessary practice did not so frequently interfere.

The Elba Clipper is keeping its readers informed and alert. As its editor you are aware of the responsibility of public officers to keep themselves equally well informed. I know of no more accurate or responsible source of community news than the people and the affairs of the Coffee County area than the Elba Clipper has proved to be.

Readers are sometimes prone to take their familiar home newspaper for granted. The people of the Coffee County area and their neighbors can take considerable pride in how well the Elba Clipper reflects their growth and influence in Alabama's natural resources, an accurate mirror and a clearly audible voice of its people and for that fact I am grateful to all of you who have a part in its publication.

I have enjoyed every visit to your area and whenever an opportunity permits I look forward to coming again.

Very Sincerely Yours,
Albert Boutwell,
Lieutenant Governor of Alabama.

Yanks Lose First Time This Year In Wind - Up Game

The Yankees almost finished a perfect season in the City League.

After sailing undefeated throughout the season, the Yanks went down to defeat the Giants, 8-2, in the final schedule game.

The petticoats finished undefeated in the Powder Puff League.

Games Wednesday The Pirates defeated the Giants 9-7 in the Little League Wednesday, last week, with Blackmon the winning pitcher, while the Dodgers defeated the Cardinals 15-6 in the Pony League with Harrison the winning pitcher.

The Red Sox defeated the Cardinals, 15-4, in the Pony League Thursday, last week, with Norman the winning pitcher, then came the heart-breaker for the Yankees Friday night when they lost to the Giants 8-2 with Ward the winning pitcher.

Powder Puff League

The Powder Puff League finished the season with the following standings:

Team	W	L
Petticoats	6	0
Pirates	3	3
Primers	0	6

In the Petticoat League Thursday, last week, the Primers defeated the Pirates 9-8, marked by a homer by Linda Hughes for the winners, and a stinging triple play by Carrie Proctor of the Primers when she caught a fly for the first out, tagged second before the base runner could return, then threw to first for the third out.

The final game came Monday night when the Yankees defeated the Pirates 8-2.

The Junior Powder Puff League finished the season with the Pirates winning two games last week, the first 13-12 and the second 16-3, marked by homers hit by Cheryl Cooper one in each game, Sue Young and Susan Miley, all for the Pirates.

This left the Pirates with four victories and no losses for the season, and the Primers with four losses and no wins.

Good Hauling Is Big Money - Saver

A lot of time and money invested by the livestock producer can go down the drain unless he takes precautions when hauling his animals to market.

et, warns Otis Russell, Auburn Extension Service livestock marketing specialist.

"An improperly loaded truck results in crowding, excessive shrink, increased bruising and market price penalties," Russell says.

He adds that mixed shipments of hogs and cattle, or heavy sows, stacks of hogs with lighter hogs are one major source of crippled or dead hogs. Such a practice also creates more bruise hazards, he says.

The specialist also points out that livestock should never be hurried while loading because it increases nervousness and causes bruising.

Two Cars Collide

Jimmie Lee Whitman, of Rt. 2, Elba, and Mrs. Frances Trammel, of Box 234, Elba, were drivers of cars which collided Friday, August 11, at 4:30 p.m. on Bradley highway No. 189. No one was hurt. No one was arrested.

THE WORM OF EQUALITY . . .

It looks like the worm has begun to turn. For so long, the American people have been fed a diet of the equality of all men that it has gotten to the point where otherwise intelligent people will argue that it is possible for a genius to come from three generations of ineptiles.

It is just one of the cycles through which mankind passes. Any student of history knows that mankind does not progress in a straight line but in cycles. And anyone with more than a grade school knowledge of history knows that always there has been one identifiable part of mankind which has taken the lead.

First it was the Sumerians, then the Egyptians, and following in order were the Israelites, Greeks, Romans, and the English-speaking peoples.

But in recent years the English-speaking peoples particularly in America, have been fed such a diet of equality that it was to risk cries of prejudice and bigotry to suggest that maybe there is a difference between the people of Spain and the people of England. And it has come to be considered a stigma even to be called a bigot, whether proven or not.

It indicates a big step in some direction when a great college like the University of Chicago will permit publication of a treatise by the noted psychologist, Prof. Henry E. Garrett, in which he says: "the equalitarian dogma is the scientific hoax of the century." In another treatise he levels his guns on a UNESCO document which advances the idea that environment, not heredity, accounts for whatever differences may appear in racial abilities.

The Public Affairs Press of Washington has published two other books equally enlightening. They are by Nathaniel Weyl and Thornton Putnam. Mr. Putnam in "Race and Reason", has this to say: "It is my considered opinion that two generations of Americans have victimized by a pseudo-scientific hoax . . . part of an equalitarian propaganda typical of the left-wing overdrift of our times, and that it will not stand an informed judicial test."

It is always funny, for instance, to hear the false logic used by propagandists of racial equality when they try to explain why the United States is so far ahead of Brazil, yet both countries have the same climate and the same natural resources of coal, iron, waterpower and soil.

Certainly all men are equal before God and before the law. The English-speaking peoples were the first to recognize the equality of all men before the law. But to assume that a child born an imbecile has the same opportunities as a child born a genius is ridiculous.
